About Me

I am a meticulous and driven Graphic Designer who can transform complex ideas into structured, captivating works. I have experience working with Adobe software, including After Effects, InDesign, Photoshop, and Illustrator. Previous work experience has allowed me to utilize AutoCAD, Teams, and Figma to create and collaborate on complex projects. My personality and initiative taking skills have made me an asset in teams because I can execute projects within scheduled deadlines while smoothly communicating between team members, clients, and contractors.

Work Experience

Independent Contracting | January 2024

Graphic Designer

I was hired to design a cohesive brand identity that could span across multimedia formats for a laundry company stationed in Fort Lauderdale, Florida. I worked with the clients to produce a variable logo, mascot, and patterning that was to their liking and could be applied to uniforms, work vehicles, websites, and more.

Bridges Land Surveying | June 2020 to July 2024

Assistant and Receptionist

I designed AutoCAD home and land mockups based off surveyed information. I made visual information easily digestible for clients through color, patterning, and line weight. Additionally, I was a receptionist for in-person meetings and oversaw answering phone calls. Explaining information, communicating it between clients and other workers, and filing final information was essential to my job. I also kept track of materials used and ensured that it did not run out.

Education

2024 to Present

BFA, Graphic Design, School of Design, University of Tennessee
Knoxville, Tennessee
